AFIACARE

Expertise, maintenance and biomedical training,
since 2021

Improve the quality, safety and efficiency of your healthcare with high-performance medical devices connected to the Electronic Health Record (EHR).

Our services focus on three key areas to support you:

Biomedical engineering

Maintenance, technical expertise & engineering for healthcare

Biomedical IT

Consulting in connectivity and interoperability of healthcare systems

Training & Executive Coaching

Coaching & biomedical training by a certified coach

MISSION COMPANY “LOI PACTE”

“Enable healthcare professionals to improve the efficiency and quality of care for patients for more inclusive healthcare.”

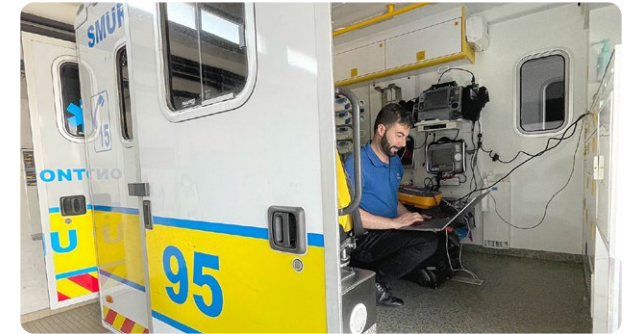

SUSTAINABLE DEVELOPMENT GOALS

AFIACARE
in partnership
of UTC Compiègne
and Bip Humanitaire

MONITORING

- Patient monitor
- Cardiotocograph
- External defibrillator
- Electrocardiograph

INCUBATOR

- Open incubator
- Closed incubator

INFUSION

- Syringe pump
- Infusion system

Per device

Quotation per unit:
Annual preventive maintenance

or

Engineer / Technician

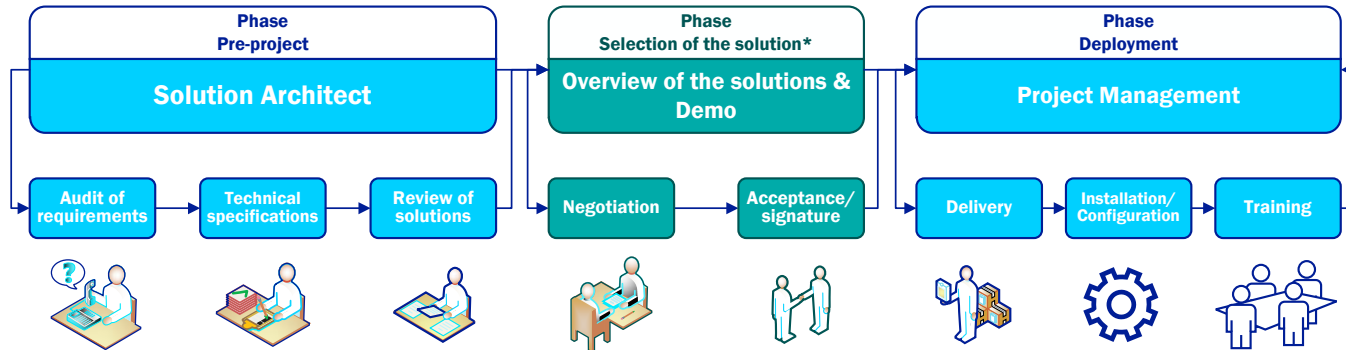

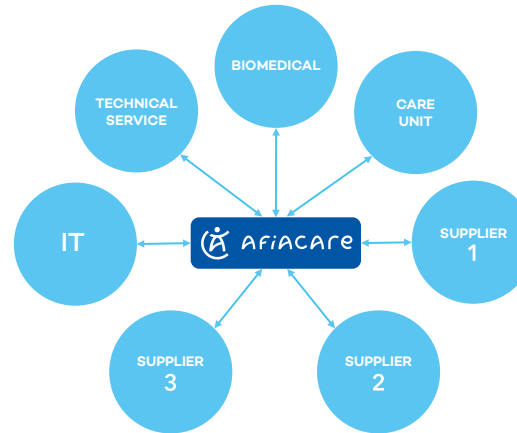

Day rate

Engineer / Technician dispatch on site

CONSULTING

AFIACARE's expertise is both **biomedical and in IT** to support you in the pre-project phase and the deployment phase of your **digital and organizational transformation**. AFIACARE offers consulting services in **project management and project implementation**.

A single contact to connect your medical devices to the Electronic Patient Record EPR.

**The decision is made by the hospital, AFIACARE can't be involved in the choice of the solution*

Pre-Project Consulting Assistance with pre-project study

- Upstream project definition and management
- Definition of the project goal, timeframe and cost
- Definition of the care unit's needs
- Biomedical and IT audit of existing installations
- Definition of the best technical solution with the different suppliers
- Definition of the service continuity plan (IT)

Project management To support project implementation

- Technical implementation of the project
- Coordination and monitoring of project deployment
- Execution of the project's requirements
- Budget and timeline monitoring
- Follow-up of upgrades and maintenance projects
- Consulting on maintenance projects and future upgrades

BIOMEDICAL TRAINING

Maintenance training modules for biomedical technicians:

- Internalising maintenance
- Setting up processes
- DM performance testing
- Electrical safety testing

EXECUTIVE COACHING

Support from a certified professional coach on a range of subjects:

- Leadership & communication
- Team management
- New position
- Young graduate

Management coaching on certification recommendations HAS, criterion 3.3-04:

Team leaders benefit from management training or coaching

Coaching 15 hours

10 sessions of 1 hour 30 mins
in person or online

Certified Executive Coach - HEC PARIS
