AFIACARE

**Biomedical maintenance, consulting, and
training, since 2021**

Enhance the quality, safety, and efficiency of care with high-performance medical devices connected to the Electronic Health Record (EHR).

Our services are structured around three key areas to support you:

Biomedical engineering

—
Maintenance,
technical
expertise
& engineering
for healthcare

Biomedical IT

—
Consulting in
connectivity and
interoperability
of healthcare
systems

Training & Executive Coaching

—
Coaching &
biomedical
training
by a certified
coach

MISSION COMPANY “LOI PACTE”

“Enable healthcare professionals to improve the efficiency and quality of care for patients for more inclusive healthcare.”

We collaborate with the University of Compiègne (UTC) to train students and offer them practical internship opportunities.

MAINTENANCE

Our expertise enables us to work on a wide range of medical equipment, across all brands, directly on site. We provide maintenance in compliance with industry standards and manufacturer recommendations, on equipment such as:

MONITORING

- External defibrillator
- Patient monitor
- Cardiotocograph
- Electrocardiograph

INCUBATOR

- Open/closed incubator
- Radiant warmer

INFUSION

- Syringe pump
- Infusion system

Per device

Quotation per unit:

Annual preventive maintenance

or

Engineer / Technician

Day rate

Engineer / Technician dispatch on site

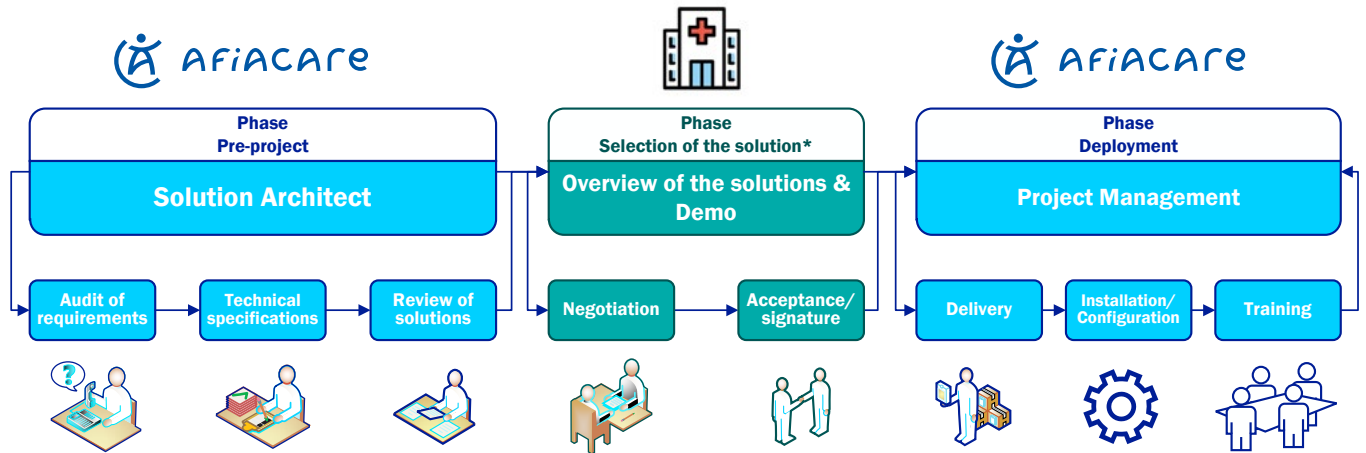

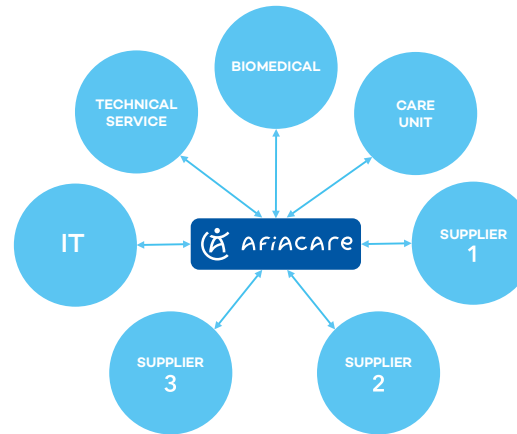

CONSULTING

AFIACARE, your partner in biomedical equipment connectivity

With our dual expertise in IT and biomedical engineering, we support you from the initial planning phase through to the deployment of your medical equipment connectivity projects.

We offer consulting services in both project ownership (AMOA) and project management (MOE).

A single contact to connect your medical devices to the Electronic Patient Record EPR.

**The decision is made by the hospital, AFIACARE can't be involved in the choice of the solution*

Pre-Project Consulting

Assistance with pre-project study

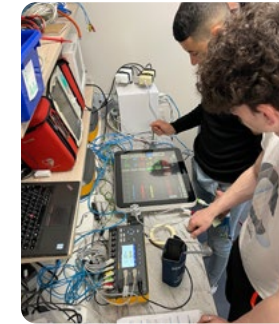

- Feasibility study for implementing a CMMS
- Definition of objectives, timeline, and budget
- Needs analysis of clinical departments
- Assessment of connectivity for existing and future medical devices
- Analysis of interfaces and communication protocols with the Hospital Information System (HIS)
- Definition and cost estimation of technical solutions with suppliers

Project management

To support project implementation

- On-site support during deployment days
- Technical implementation in line with project requirements
- Coordination of stakeholders and deployment follow-up
- Operational translation of the needs expressed by the project owner (AMOA)
- Strict monitoring of budgets and timelines
- Follow-up on upgrades, maintenance, and guidance on future developments

BIOMEDICAL TRAINING

Maintenance training modules for technicians:

- Internalising maintenance
- Setting up processes
- DM performance testing
- Electrical safety testing
- Other modules available upon request

EXECUTIVE COACHING

Support from a certified professional coach on a range of subjects:

- Leadership & communication
- Team management
- New position
- Young graduate

Management coaching on certification recommendations HAS, criterion 3.3-04:

Team leaders benefit from management training or coaching

Coaching 15 hours

10 sessions of 1 hour 30 mins
in person or online

Certified Executive Coach – HEC PARIS
